

JONATHAN COLLINS

SOFTWARE DEVELOPER

I am a self taught, full stack developer that moved into the tech industry from a career in finance. At my core I am, a problem solver, in a constant state of learning, and in pursuit of great teams immersed in the ever changing landscape that is software development. I enjoy building amazing applications with amazing people, using both frontend and backend technologies. I have also worked hard to develop soft skills such as communication, project planning, and research. I am a Professional Scrum Master with my PSM1 certification and am working towards certification as a Professional Scrum Developer as well.

2020 PRESENT

LINEAGE LOGISTICS SOFTWARE DEVELOPER

I onboard and create new logistical and inventory solutions. Working with everything from web based stacks that include Javascript, to complex inventory management systems that use technologies like Java and SQL. Additional responsibilities include addressing user needs within ticket systems like Kaseya and SAMANAGE.

2014 2020

MAINES PAPER & FOOD SAP VISTEX ENGINEER

At Maines I worked with complex pricing schedules and programs inside of SAP's bolt on library VISTEX. I also developed web technologies such as an advanced truck tracker using a Verizon GPS API and a web based systems dashboard for purchasing agents

2004 2014

HSBC - LINSOCO PRIVATE LEDGER LICENSED FINRA BROKER

Worked with clients to increase their overall wealth, protect assets, and provide diversified income portfolios. Additionally, I worked with large financial data sets and advanced modelling techniques.

2001 2004

TOYS R US STORE MANAGER

Ran day to day operations including team coordination, inventory management, and scheduling. While here I developed a repair ticketing system in Visual Basic.
